1. An agreement has been made between Sachsenwerk, Radeberg, and the Oberspreewerk, by which the latter factory will deliver during 1950 tubes for 40,000 television sets. This includes a 12-inch cathode-ray tube with magnetic controls.
2. The Russians stated that their approval would first have to be obtained for the types of tubes intended to be used in these sets. These types have not yet finally been decided, but the Russians rejected the proposal that the ES. III should be used as a "Kippstrahl".
